

1st Myanmar-German Renewable Energies Symposium

Opportunities and Challenges in the solar power industry in Myanmar

23 October 2017, Rose Garden Hotel, Yangon

Download conference agenda

HIGHLIGHTS

Myanmar needs a lot of energy now and renewables are fast to install.

- Puree Tantivirasut, DEG

The 1st Myanmar-German Renewable Energies Symposium was very exciting and beneficial to all stakeholders and we are very grateful for that.

- U Valentino Soe Myint, Sunlabob

There is a great need for assistance in Ayeyarwaddy Region, and every help from international organizations or investors or companies is highly appreciated.

- U Sa Win Naing, Electricity Supply Enterprise Ayeyarwaddy Region

Any electricity supplier, with the exception of coal, who can supply the power unit for less than 10 US cents will be welcomed at the Myanmar Ministry of Electricity and Energy

- U Ye Min Aung, UMFECCI

Technology is not the problem for implementing renewables. Problems are rather on the regulatory level.

- U Aung Myint, Renewable Energy Association Myanmar

100+ participants from the Myanmar and German public and private energy sector
